04079 Micro Fiber Chema

0.005 Denier super microfiber nonwoven cloth displays high performance water absorption and is similar to leather in texture. The surface is finished with a special urethane- treatment. It does not harden even if it becomes dry, and is very convenient because it helps you to save effort of making it soft again with water.

* 1denier is equal to a string which is 9000m in length and 1g in weight. It is said that a hair is equivalent to about 60 denier.

JAN code**04178 Micro Fiber Chema WIDE Type**

0.005 Denier super microfiber nonwoven cloth displays high performance water absorption and is similar to leather in texture. The surface is finished with a special urethane- treatment. It does not solidify even if it becomes dry, and is very convenient because it helps you to save effort of making it soft again with water. This wider size has improved water absorption and water retaining capacity, compared to the conventional "Micro Fiber Chema". It shortens the frequency of squeezing the cloth, which helps you work more efficiently.

* 1denier is equal to a string which is 9000m length and 1g weight. It is said that a hair is equivalent to about 60 denier.

JAN code

04171 Rich & Soft Grip

Compared to a conventional urethane sponge, it has high water-retentive capabilities and is soft. In addition to washing, it prevents a film-coating from causing damage because it is difficult to clog and to produce friction. The grip assists you to even wash the roof, and the package can be used as storage case, which prevents dust from accumulating after use.
