

02060 4-X Tire Cleaner

This new system super mist mousse helps you rinse fast and easy, which reduces working time by a quarter when compared with other conventional methods. It washes off unwanted residue quickly and achieves a beautiful shine without unevenness. 2 types of high viscosity silicone resins adhere firmly to tires and bring out gloss and barrier capability for a longer time.

Directions

- * Shake the can well and spray it close to tires.
- * You can also use it on wet tires.
- * Do not drive until the tires dry.

JAN code**02001 Leather & Tire Wax**

Not only does it prevent tires and the plastic leather from deteriorating, it also gives a glossy finish to the surface. This authentic wax brings out the maximum natural shine in the texture of the material. When you use it on tires, wiping off is NOT necessary. When you use it on the leather, please wipe it off with a cloth after spraying.

Directions

1. If you use tires, wash off mud or dirt in advance.
2. Stand approximately 15-25cm away from the tire sidewall and apply evenly. Afterward spread it thin with a dry cloth.

JAN code**02006 Leather & Tire Wax (T)**

Leather & Tire Wax (T) effectively protects rubber, plastic, synthetic leather or vinyl found on the tire, dashboard, door and so on. It powerfully repels water, oil, dust and other unwanted residue, and prevents the applied areas from deteriorating or being damaged by cracks, while creating an extremely clear gloss on the surface.

Directions

- * Shake the can well and spray it 25-30cm away from the desired area.
- * Spread evenly and wipe it off with a dry clean towel.
- * Do not drive until the tires dry.

JAN code**02066 Black Magic**

Application to tires achieves a rich, black gloss just like a brand-new car. Furthermore, UR black rubber coating, which blends Carbon Black, has a sufficient durability and maintains a gloss and anti-fouling effect.

Directions

1. Wash off dirt in advance, and dry the tire surface.
2. Shake the bottle well with the cap on, remove the cap and attach the sponge side to the tire sidewall. Spread evenly letting the fluid out little by little.
 - * If the black liquid gets on wheels or car body, please wipe it off immediately.
 - * If you apply it thickly, it will be hard to dry.
3. Dry for approximately 5-10 minutes (for 20 minute in the winter).
 - * Be sure not to wet the tire until it is finished drying.
4. Wipe off the liquid attached to the sponge side and tighten the cap. Store standing up.

02015 Tire Black Wax

This solid wax creates a hard coating and keeps its durability for a long period of time. It enhances tires natural glossy black color.

Directions

1. Remove dirt from tires, leather or bumper in advance.
2. Take the cap off and take out the included sponge. Put the wax on desired area and apply it thinly. Allow to dry for approximately (5-10 minutes), and polish with a soft cloth to get ultimate, beautiful shine.

02082 BLACK BLACK -Hard Coat for Tire-

BLACK BLACK creates a thick coating on tires and maximizes shine along with super durability. The non-sticky, hard coating prevents dirt from adhering, which helps your car maintain ideal conditions by simply washing. The coating lasts for more than 60 days, and this rubbing type does not splatter over other parts.

Directions

- * Be sure to wear protective gloves.
 - * If the tire is very dirty, remove unwanted residue in advance.
 - * Do not use this product on wet tires.
1. Shake the bottle well and put the liquid on the black side of the included sponge. Allow enough of the liquid to soak thoroughly into the sponge.
 2. Start applying this from the upper side or right or left side and spread it over the whole tire. Apply repeatedly until the desired level of gloss is present, while being careful about any unevenness.
 3. Dry for approximately 5-10 minutes after applying.
- * If the liquid gets into unwanted parts, wipe it off immediately with a clean towel or SOFT99 Silicone Off (sold separately).

02079 Water-Based Tire Coating "PURE SHINE"

PURE SHINE is a water-based tire coating without petroleum solvents. It creates a chic and natural gloss, making your car look more elegant. Spreading emulsion type liquid, which spreads well, with the included sponge never allows it to be splattered to car body or wheels. The included two special sponges, "Pitasupo", can fit between wheels and tires.

Directions

- *Be sure to clean any sticky or unwanted residue on tires in advance.
 - *Do not apply it onto wet tires.
1. Shake the bottle well and put a moderate amount of the liquid on the included sponge.
 2. Be careful not to get the liquid on the wheels, and be sure to spread the liquid on the whole side of surface of the tires.
 3. The entire process is completed when the liquid dries for 5-10 minutes after application.
