

04071 Glass Cleaning Wipe

This semi-wet sheet has a special three-layer structure which does not allow any streaks or unevenness to remain on the windshield. The upper and lower layer remove dirt while the middle layer securely absorbs the dirt. Rewiping is NOT necessary! There is no doubt that you will be satisfied with the result! You can also use this product to clean the dashboard as well.

Directions:

1. Remove a sheet from the package and use it to wipe the glass.
2. Refold sheet when surface of the sheet is too dirty in order to continue wiping.

04085 Handy Wiper for Glass Cleaning Wipe

We have thoroughly researched the aspects of 'head cushioning,' 'whip of handle and head,' and 'the angle' of our Handy Wiper. This product offers an even and easy wipe, even while sitting down. Furthermore, our Handy Wiper is a perfect match with our Glass Cleaning Wipe, providing great synergy and excellent cleaning capabilities. The detachable handle and head make it easy to store away. Glass Cleaning Wipe (10sheets) is included.

Directions:

1. Set up by putting the handle into the head.
2. Put the included special sheet (Glass Cleaning Wipe) securely into the slit of the head and begin wiping the windshield.

04053 Glass Cleaner Clear

Our newly developed liquid cleaner is a rinse aid that wipes off smoothly because of its ease-of-use with towels or rags. The result is a very transparent shine without the marks or streaks that come as a result of wiping.

Directions:

1. Shake the can well and spray it 15-20cm away from the glass.
2. Wipe it off with a dry clean cloth while spreading the bubbles.

04066 Glass Cleaner 400

The amazing cleaning ability of the Glass Cleaner 400 removes stubborn glass stains like oily dirt and dry/sticky bird droppings. The rinse aid product leaves no marks, streaks, or glare. The anti-fogging agent achieves long-lasting transparency. You can use this product on the inner side of windows as well in order to remove tar or oily dirt. The bubbly solution allows for easy use, non-messy use because there is no need to worry about liquid splashing around.

Directions:

1. Turn the nozzle to <MIST> and spray it 15-20cm away from the glass.
2. Wipe it off with a dry clean towel, spreading the bubbles around the surface of the glass.

05064 Glass Compound Z

Glass Compound Z is made up of tiny, hard and soft abrasive particles which easily break down oily dirt or dirt film from glass. A special application sponge is included.

Directions:

1. Remove dust and dirt from the glass with water, and wipe off any water drops remaining on the surface.
2. Shake the bottle well.
3. Put the liquid on the gray side of the sponge and polish until the surface does not repel the liquid anymore.
4. Cleanly wash off the glass surface.

JAN code**04101 Glaco Glass Compound Roll On**

Combining the abrasive powder of small, hard particles and big, soft particles, Glaco Glass Compound Roll-On is able to remove the toughest stains made from oily dirt and fluorine film. By just applying the product lightly onto the glass you will see immediate results as the roll-on removes the oil-film with ease. This convenient product can be used as surface preparation just before applying any coating to the glass.

Directions:

1. Remove dust and dirt from the glass with water, and wipe off any water drops remaining on the surface.
2. Shake the bottle well with the cap on and remove the plastic seal.
3. Polish onto the glass until the surface stops repelling the liquid while the side of the bottle is pressed.
4. Afterwards, wash the glass clean.

JAN code**04063 Glaco Glass Compound Sheet**

This abrasive compound, which is used to polish optical lenses, can remove oil film and old dirt coating without damaging the glass surface. It doesn't leave oil film or dirt after wiping, so we recommend using this before applying any sort of glass coating.

Directions:

1. Remove a sheet from the package.
2. Fold the sheet as necessary, and wipe the glass until the surface stops repelling the liquid.
3. If the sheet gets dry, refold it and continue to use a clean side.

**05067 GLASS ROOF ONE -Glass Roof Cleaner & Coat-**

This car cleaner and coating agent has been especially developed for use on the glass for sunroofs. The glass cleaner will get rid of scaly spots which conventional oil-film removers or compounds cannot. In addition to this, the coating agent has both incredible anti-fouling and water repellency which keep your car in good condition for up to 6 months. A pad for the cleaner and a sponge for the coating agent are included.

Directions:

1. Remove dust or dirt with water, and wipe any remaining water drops from the surface.
 2. Shake the bottle of the glass cleaner and pour the liquid onto the white side of the included gray pad and begin polishing.
 3. Wash the glass cleanly.
 4. Wipe off any remaining water drops and dry completely.
 5. Shake the bottle of the coating agent, pour the liquid on the gray side of the included pink pad, and apply on glass.
 6. Afterward, dry for 5-10 minutes and wipe with a clean dry towel.
- *Do not allow area to get wet for 12 hours after wiping.

**04073 Glass Cleaning Wipe (Anti-Fog)**

By simply wiping onto surface, you will enable a powerful fog resistance while also cleaning the glass. Not to mention removing dirt from the outer side of windows, it will cleanly get rid of sticky tar, stain and other unwanted residue on the inner side of windows. This product does not take up much space, which allows you to store it in the car.

Directions:

1. Take out a sheet from the package and wipe the glass.
2. If it gets too dirty or dry, refold and continue using another side.

05060 Anti-Fog Spray

By just spraying and wiping, you will get rid of irritating glass fog in a flash. If you apply it on glass in advance, it will prevent dust and smoke from sticking to the glass which also causes fogging.

Directions:

1. Shake the can well.
2. If the inner side of the glass is very dirty, make sure to pre-wipe with a dry cloth.
3. Spray product directly onto glass or on a dry towel or tissue paper, until bubbles have disappeared and spread evenly.

05063 New No Water Drop

By just spraying onto wet side-view mirror on a rainy day, all remaining drops will disappear instantly! Even if dirt or oil-film remains on the mirror, the newly developed polymer found in this product creates a strong hydrophilic coating, which will continue to allow you to have a clear view just after spraying! You can also use this product on hydrophilic mirrors.

Directions:

1. Shake the can well.
2. Spray it 10 cm away from wet mirror.

*Be sure to use this product either on a wet mirror or on a rainy day.
