JAN code**09144 Liquid Compound #3000**

Liquid Compound #3000 is an essential item, especially for finishing up repairs, which helps you create mirror-like shininess on the car's surface. It removes minor scars after rubbing with sandpaper, therefore, as long as the paint is a light-colored solid, you can achieve mirror-like shininess.

Directions

1. Use water to remove dirt and dust in advance.
2. Shake the bottle well with the cap on, apply a small amount of the liquid to a dry soft cloth and start polishing desired areas. Can be used with a buffer.
3. Wipe it off with a dry cloth.

JAN code**09184 Compound Sheet**

Not only does Compound Sheet shorten the painstaking process of polishing after repairing, but also it improves the result and works on the delicate painted surface unlike waterproof sandpapers. This finishing product fits for professional use.

Directions

1. Use water to remove dust and dirt from the car body.
2. Be sure to use the sandpaper with water while polishing.
3. Wipe off water drops after polishing. When the part where you polished becomes white without unevenness, the part is ready. Continue by polishing a wider area. Wash it off completely.
4. Wipe off water drops and finish up with Atelier 99 series.
