

20155 Shampoo for Glasses

All you need to do is spray and rinse! Shampoo for Glasses will completely remove any stubborn residue, such as skin oil, which a conventional cleaning cloth for glasses cannot accomplish perfectly. Also, as there is NO rubbing required, there is no possibility for damaging the glasses. This neutral type is friendly to both people and glasses. Replace with the refill after using it all up.

Directions

1. Turn the nozzle to <ON>, holding the glasses with hand and spray, making sure to cover the whole of each lens.
*4-5 shots on average.
2. Rinse immediately.
* Do not use hot water.
3. Wipe off remaining water drops with a soft clean cloth or a tissue.

JAN code**20141 Glass Cleaning Tablet with Hard Case**

Fine enzyme-powered bubbles will wash your glasses spotlessly. Not only do these Glass Cleaning Tablets remove dirt from gaps in between lens and frames, but they also can kill germs. You can also use it to plastic lens and metallic frames.

Directions

- * If the screws of the glasses are loosen, tighten it up in advance.
1. Put the glasses into the included case and pour water until the whole glasses sinks into. * Do not pour water over the line to prevent the bubble from coming out of the case.
 2. Take out one tablet and drop it to the bottom of the case. Bubble will come out right after that, and wash the glasses with its fine bubbles.
 3. The tablet will disappear about 2-3 minutes after that (It may take about 10 minutes in the cold temperatures), and the entire process is done when the bubbles have disappeared and then the liquid has turned into transparence. Afterward take the glasses out of the case immediately and rinse well.
 - * If the glasses is extremely dirty, let sit for 5- 10 minutes after the bubbles has disappeared. It will be effective.
 4. Wipe off remaining water drops with a tissue or a soft clean cloth softly.
 - * If you use it once in 2-3 days, it prevents dirt from adhering to the glasses and makes it easy to remove even if it gets to the glasses.
