

Washing Brush Kit

This was developed for thoroughly removing dirt from detail parts!

Cleans detail parts which sponge and cloth CAN'T get into.
3 HEAD BRUSH + 1 SMALL BRUSH !

The trick to make your car look different from others is how well maintenance of detail parts are done! We developed this brush for those who never miss even one dirt on wheel nut or someone like that. Target users are also those who haven't bought any specialty tools even though they wanted.

POINT 1

TRIPLE HEAD

Triple separated head

It allows to wash a spoke, holding it between 2 head, and thoroughly cleans gaps between wheel nut and wheel hole with one head as an interdental brush does.

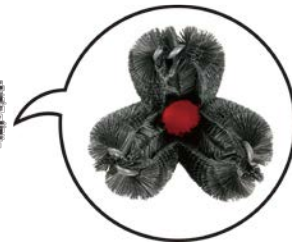

The core coated with resin

The core coated with resin prevents scratches while cleaning detail parts.

POINT 2

HEXAGON GRIP

3D rubber allows to grip firmly and use it with proper force.

※ This photo is taken to show the structure well by opening each head.

POINT 3

SMALL BRUSH

Fine-point brush helps to clean detail gaps such as emblems and door aperture.

Easily cleans parts which was hard to wash!

Wheel bolt hole

Gaps between headlight and bumper

Unpainted resin front

Door

Emblem
