

Magical Tap Polishing Sheet

Taps and pipes for the bathroom, kitchen and washstand will be squeaky clean easily!

FEATURES

1. Micro particle powder completely removes water stains and fish-scale-look dirt from taps.

Our cloth generously contains micro particle powder (1.5nm) which is used for precision polishing. Unlike other polishing compounds with big particles, it hardly damages metallic surfaces, completely removing stubborn dirt from taps.

**Be sure to test the product in an inconspicuous area to ensure there are no adverse effects to the surface.*

BEFORE

AFTER

2. Restores the original shine!

It removes dirt from taps, leaving a squeaky clean surface. Included "gloss ingredients" maintain the beautiful results for a long time.

3. Our rectangular cloth allows you to easily clean cylindrical and curved parts.

Cubic sponges don't allow you to completely clean around taps because there are many cylindrical parts, curves and gaps. They also make your fingers tired. Our rectangular cloth is specially designed for cleaning taps, allowing you to completely clean the entire taps with less force.
