

# LCD Cleaning Cloth "STICK ON"

**Excellent storage performance & Cute designs!  
"Adhesive" screen cleaning cloth!**

Due to the popularity of smartphones and tablet computers using PND (Portable Navigation Device) and car navigation applications, circumstances surrounding the automotive navigation system have been changing at an astonishing speed in recent years. In order to respond to the changing automotive circumstances, we release cute, easy to store, conveniently portable cleaning cloth that seemingly doesn't look like a cleaning cloth.

## FEATURES

### 1 After removing dirt, adhere to nearby automotive navigation system and store it!

Our strong adhesive acrylic foam sheet allows you to use it repeatedly. Once you adhere it to the dashboard or glove compartment, it is very convenient, it doesn't take up the space, allowing you to easily use it whenever you want. There is no glue residue left behind because this product is not glue or sticker. When the adhesive power weakens, wash it lightly with a neutral detergent and allow it to dry, then the adhesive power will be restored.

### 2 For lovely decoration in your car!

Colorful and cute shaped cloth such as clover and penguin will brighten around plain dashboard in your car.

### 3 High cleaning performance !

The extreme microfiber, Belima®X, on the cleaning side completely removes finger prints and dust from the screen.

※Belima®X is KBSEIREN's trade mark.

### 4 For your smartphone, handheld game console, etc !

It's so convenient, it can even be used to clean portable devices such as smartphone, handheld game console, tablet computer, digital camera, etc. Once you adhere it to these devices, you won't lose it, but can clean it whenever and wherever you like.

# LINEUP
