

## Glaco Power Blade Multi-Fit

The Glaco wiper, which has high rain beating performance, produces exclusive for imported cars. The combination of "high wiper arm pressure" and "uneven pressure disperse of the aero wiper design" causes judder and hinders the water repellent effect. The aero wipers are short and well-designed. The tournament type wipers can fit any curvy shaped glass surface and wipe off rain thoroughly. Glaco Power Blade Multi-Fit is unique designed wiper blade that has the features of these 2 wipers. Unlike recent Japanese cars, even if they are the same manufactures and same models, the bracket shapes of wiper arms are different. 6 different types of adapters come with Glaco Power Blade Multi-Fit, so that it is applicable to various cars depending on the shapes of wiper arm bracket.

### Directions:

\* In case of the temperature below 10°C may appear the water repellent effect slowly. Then operate the wiper as long as appear the effect. Using the defroster is effective to risen the glass temperature.

\* In case of rainy day or wet glass condition may appear the water repellent effect slowly. Then operate the wiper again excepting for rainy day.

\* If use window high detergency wash fluid, water repellent effect may be weaken.

\* Do not wipe off black powder which adheres on wiper surface. This works the wiper operation smoothly.

\* Immediately replace wiper when decrease wiping or water repellent performance.

\* Recommend to replace the wiper blade once a year.

## Glaco Wiper Power Blade Snow Type

Glaco wiper's excellent water repellent as it is, create stable wiping effect when drive highway as well.  
 3 minutes operation creates water repellent layer even in degree of frost.  
 Only this 3 minutes operation, creates the water repellent layer whole windshield which prevent freezing frost or snow. Also prevents adhering snow melting agent or mud as well.  
 Adopt aero construction keeps stable wiping effect even in high speed, strong wind and snow storm.  
 Adopt silicone rubber superior to anti-freeze and high ridged designed frame can push out heavy wet snow.  
 Of course, the frame covers by hood to prevent freezing or snow drift.

### Directions:

1. Operate the wiper around 3 minutes without wet glass surface. It starts creating water repellent layer.
- \* The temperature below 10°C, it may delay appearing water repellent effect. In this case, operate until appearing water repellent effect. Also effective to increase the temperature by defroster mode.
- \* In case of rain or wet glass, it may delay appearing the effect, then operate the wiper until it appears.
- \* It may decrease the effect when use window washer as detergent effect type.
- \* Do not wipe off the black powder which adhere on wiper rubber, this ingredient makes operating wiper smoothly.
- \* Replace the wiper when decrease the wiping or water repellent effect.

**09130 Blade Reviver**

Use the power of Fusso to stop that irritating wiper judder and restore smoothness to your wiper blades! Functional elastomers fill in the tiny cracks of deteriorated rubber and reduce friction.

**Directions:**

Note: Apply only to clean, dry wipers. May be applied multiple times for greater effect.

1. Shake well, remove cap, and spread the liquid thinly onto both sides of the wiper rubber.
2. Use a soft cloth to wipe the liquid along the rubber 2 or 3 times.
3. Dry for 30 minutes before resetting the wiper. Do not use the wipers for 2 hours after application.

**08072 WIPER BLADE REPAIR PAINT**

This simple yet effective pen masks rust or worn paint with a finish that matches the painted surface of the wiper. The shaped nib allows easy masking at any level of detail. Shake well and test on cardboard before use.

**Directions:**

1. Shake well with the cap on
2. Take off the cap and slowly press it onto a cardboard a couple times until the paint comes out.
3. Start painting after testing on cardboard.

**05500 Glaco Wiper Clip Adapter GW-A**

This allows the use of Glaco Wiper Power Blade Snow Type on vehicles that were previously not supported.

**Directions:**

1. Attach to blade. Open the blade cover, slide the U-shaped hook of the adapter to the clip of the blade, and close the cover so a click is heard.
2. Attach to arm. Slide the U-shaped hook of the wiper arm into the clip of the adapter until a click is heard. To remove, press button on bottom of clip and slide out.
