

02183 ROOMPIA NIONAX - Direct Injection Fabric Seat Deodorizer

This fabric seat deodorizer directly attacks and neutralizes smells trapped in fabric seats, effectively removing smells when conventional products would fail. The newly developed direct injection mechanism allows the deodorizing and anti-bacterial compounds to penetrate directly into the inner structure of the cushioning to attack those stubborn smells from sweat, pets, tobacco, etc. to provide a complete cleansing treatment for fabric seats.

Directions:

* first wipe down the whole seat with a wrung-out damp towel.

1. Shake well and unlock the nozzle.
2. Press the direct injection nozzle directly into the fabric seat, spacing injections by around 30 cm, 4-6 shots each for the seat and backrest, and 1-2 for the headrest. Each injection should be around 1 second.
3. Using the spray lever, spray over the entire seat surface from around 20 cm away.
4. After spraying, wipe down the seat with a dry towel, and leave to dry completely (at least 4 hours in summer, at least 12 hours in winter).
