

**00251 Refresh Cleaner for Coated Cars**

This is a cleaning system formulated especially for professionally coated vehicles. A mild detergent removes stains and water marks, while leaving a silicone polymer layer to repair any damaged areas of the coating, and to produce great gloss and water-repellency. This product is a pH-neutral, water-based system, which is suitable for any vehicle.

**Directions:**

Note: Apply to a washed and thoroughly dried car.

1. Shake well before use.
2. Apply a coin-sized amount of liquid to the included towel, and spread across the surface while polishing in. Apply panel-by-panel, using more liquid in any heavily soiled areas.
3. Change the towel surface occasionally to prevent unevenness.

**00495 Stain Cleaner Strong Type**

Just spray on and wipe off to remove stubborn dirt that won't budge with standard shampoo. This product contains no compound, and leaves no white residue, so rewiping is not necessary. An aroma of grapefruit completes the feeling of freshness.

**Directions:**

Note: Wash off any dust or dirt possible before use.

1. Shake well before use, then turn the nozzle to "ON".
2. Spray onto the surface of the vehicle, and wipe off with a clean, dry towel before the liquid dries. Work on an area about 1/4 the size of a medium bonnet, using 3 to 5 shots each time.

**00464 FUKUPIKA Stain Cleaner 8 wipes**

Using a powerful detergent to remove stains and water marks, the specially designed nonwoven fabric pulls the dirt inside to avoid scratching as it glides across your vehicle's surface, leaving it shining and beautiful.

**Directions:**

1. Open the front flap, and pull out one wipe.
2. Fold the sheet into quarters and wipe down the body of the vehicle, spreading out the cleaning liquid. One sheet should cover roughly a bonnet-sized area.
3. If any liquid residue remains, wipe up with a clean towel.

Note: Keep refolding the wipe to expose fresh surfaces and avoid spreading any dirt.

**04119 Fukupika Bugs & Droppings Removal Wipes**

Dead bugs, bird droppings, and tree sap all cause damage to your vehicle's paintwork, and they can strike at any time! This wipe is formulated especially to easily remove such contamination, and save your paintwork from attack. No petroleum-based solvents.

## Directions:

1. Open the front flap, and pull out one wipe.
2. Do not rub with excessive force. Let the cleaner liquid penetrate the dirt, then wipe gently to gradually remove it. Keep refolding the wipe to expose fresh surfaces and avoid spreading any dirt.
3. In particularly dirty areas, first wipe off the dirt, then wipe up once more with a fresh surface of the sheet.
4. If the entire wipe is dirty or becomes dried out, please use a fresh sheet.

Note: If any streaking or unevenness remains after use, buff off with a clean, dry towel.

A clay cleaner for cars that removes iron fallout and roughness on the body, which cannot be removed using conventional techniques. It is a very soft type, easy to knead, and easy to use.

Also removes insects, bird droppings, pitch, tar, etc. Compatible with all paint colours.

Directions:

1. Wash and dry thoroughly before use.
2. Knead clay thoroughly with hands until it softens, and then return it to its original flat state.
3. Slide over area to be treated, with continuous application of water or dilute shampoo.
4. When the surface becomes dirty, fold inwards to expose a clean surface. If the claybar becomes very dirty throughout, replace immediately.

**04265 Shampoo For Wax Coated Vehicle**

A pH-neutral, gentle shampoo designed with professionally coated cars in mind, the included sponge is designed to create ultra-fine bubbles to clean thoroughly, without the need for harsh chemicals or abrasives. This gentleness makes it perfect for maintaining ceramic coatings, or helping a coat of wax last longer.

**Directions:**

1. Rinse off dust and sand with water.
2. Dilute shampoo, one capful (approx. 20 ml) to 1 litre of water. Apply to sponge and wash car gently while creating a rich lather.
3. Rinse thoroughly and remove leftover water droplets with a towel or cloth.

**04287 Treatment Shampoo For Coated Cars - EXTRA GOLD-**

A maintenance shampoo for ceramic-coated vehicles, this gentle formulation also incorporates a dynamic repair resin to patch up mild damage to the coating. This leaves the surface smooth and glossy after use, not to mention water-repellent and protected! No abrasives are used in this product.

**Directions:**

1. Rinse off dust and sand with water.
2. Apply shampoo to a wet sponge and wash car gently. This product forms light suds.
3. Rinse thoroughly and remove leftover water droplets with a towel or cloth.

**04293 Prime Clear Shampoo -Cleansing Shampoo for Coated Cars-**

A combination of pH-neutral surfactant and mild cleansing powder removes stubborn dirt and water marks from ceramic-coated vehicles, without damaging the coating itself. This product is compatible with all colors.

**Directions:**

1. Rinse off dust and sand with water.
2. Shake well and open the shampoo, apply generously to the included sponge, and wash the vehicle.
3. Rinse thoroughly and remove leftover water droplets with a towel or cloth.

**04280 Neutral Shampoo Creamy Type**

Powerful, pH-neutral, and compound-free, this high-powered shampoo lathers into a thick, creamy foam that just melts the dirt away. The sponge glides over the body on a rich layer of fine bubbles. Despite its powerful foaming ability, this product has been designed with ease of rinsing in mind. May be used on coated vehicles, diluted 1:50. Compatible with water- and air-driven foamers.

**Directions:**

1. Rinse off dust and sand with water.
2. Apply shampoo to a wet sponge and wash car gently while creating a rich lather.
3. Rinse thoroughly and remove leftover water droplets with a towel or cloth.

**JAN code****04940 Perfect Foam - Starter Kit**

This foam gun requires no water source, let alone a pressure-washer/compressor. Designed to create a rich, cleansing foam for a satisfying and fun experience when washing.

**Directions:**

1. Add 1000ml of water to the tank.
2. Add one sachet of Perfect Foam Shampoo Type S.
3. Put the cap on the tank and close tightly. Shake gently to mix shampoo.
4. Pump the lever to increase pressure. Keep pumping until the lever becomes stiff (about 50 times).
5. Squirt foam from around 20-30 cm away. When the pressure drops, resume pumping to increase pressure.
6. Wash with a soft, clean sponge or mitt, then rinse thoroughly with water.

Control No.JAN code**02901 ALAUNEN AWATECH SHAMPOO**

Just two pushes, and a litre of water into the bucket! Pump-action requires no measuring. The high concentration shampoo can be diluted 100 times and used to wash about 80 medium-sized cars. Quick and luxurious foaming ensures great cleaning power and workability. Mango scent, with a hint of citrus, makes washing your car more enjoyable. No-compound, pH-neutral type, suitable for coated vehicles.

Directions:How to use the pump

1. Turn the pump to "OPEN" while holding the base of the pump. The pump head rises to open.

2. After use, attach the stopper attached to the neck and store.

NOTE: The stopper does not allow the pump to be sealed tightly.

For long-term storage, turn the pump head in reverse while pushing it in, to seal tightly. Take care of liquid spillage.

How to use (for one medium-sized car)

1. Rinse grit and dust thoroughly before use.

2. Put 2 pushes of the solution into a car wash bucket.

3. Pour 1L of water quickly, and whisk.

(Take care to avoid contact with eyes or clothes.)

4. Scoop the foam in the bucket with a car wash sponge soaked in water, and wash the car, gliding gently on the body surface. Squeeze the sponge to release richer foam.

5. After washing the car, rinse well with water until all foam disappears.

**JAN code****09506 Piano Black Restoration Kit**

The high-gloss black plastic known as piano black shows scratches very easily, and can show age much more quickly than paint or other areas of the vehicle. This kit makes it easy to restore painted and unpainted piano black and other high-gloss plastics by hand, refining them to a near new condition.

**Directions:**

\* Be sure to thoroughly clean and thoroughly dry the area to be treated, and mask off neighbouring areas. Use a scratch removal compound (sold separately) with the compound sponge to remove any deep scratches beforehand.

1. With the cap closed, shake the bottle well.
2. Choose an ultrafine pad size appropriate or comfortable. Apply a moderate amount of compound to the black surface of the pad. Polish the surface while spreading the liquid in horizontal and vertical motions. Aim work on one 30×30 cm area at a time.
3. After polishing, remove any masking and wipe up any residue with a soft, clean towel.
