### 04171 Rich & Soft Grip

Compared to a conventional urethane sponge, it has high water-retentive capabilities and is soft. In addition to washing, it prevents a film-coating from causing damage because it is difficult to clog and to produce friction. The grip assists you to even wash the roof, and the package can be used as storage case, which prevents dust from accumulating after use.

JAN code**04911 MaxWash LONG Sponge**

This long sponge was designed with big vehicles in mind. On minivans, SUVs, trucks, any large vehicle- the 73cm long sponge, featuring a 45cm long head, makes it easy to wash the broad roof and glass of large vehicles, with none of the hassle of moving a hop-up or climbing up and down. Featuring "Suspension Holes", this satisfyingly efficient sponge balances its large size with a novel structure that reduces weight and increases flexibility. All this combines to make washing your large vehicle into a remarkably pleasant activity! Suitable for use on coated and uncoated cars.

Directions:

1. Ensure sponge is suitably wet before use.
- \* When applying shampoo directly to sponge, make a rich lather before use. When diluting in a bucket, form a lather and then scoop the suds up with the sponge. Rinse sand and mud from the vehicle before washing. Suitable for use on coated and uncoated cars.

**04910 MaxWash LONG Water Blade**

This water blade was designed with big vehicles in mind. On minivans, SUVs, trucks, any large vehicle- the 60cm long blade efficiently deals with water sitting on broad surfaces. Not only that, but the highly flexible natural rubber blade also adapts itself to the surface contours, making drying quick and easy for any kind of vehicle. Suitable for use on coated and uncoated cars.

**Directions:**

1. Gently press the rubber blade onto the glass or body, and remove the water as if stroking the surface with the blade.

\* To avoid scratching, do not use on dry paintwork.

**04913 MaxWash 4Pockets Cloth**

This highly absorbent cloth can be used in various ways. Spread out, it can dry large areas very quickly, and can also be folded for use e.g. with coatings.

Twist pile substructure massively reduces drag for light work and the 4Pocket structure makes work less tiring.

**Directions:**

By putting both hands in the pockets, the towel can fit to contours and dry large areas.

Be sure to avoid touching the ground.

Easy fits into the grill or under visors to make drying awkward spots easy.

Absorbs well from glass surfaces also.

By folding the cloth, absorption power can be increased.

**04199 G-Jetta**

This special nozzle allows easy washing at home with a hose. Both water pressure and spray pattern can be adjusted smoothly, perfect whether rinsing dust or foam, and adjusted to the shape of each part. A sturdy construction with ergonomic rubberised grip makes it easy to use.

**Directions:**

1. Close lever.
2. Insert the nipple firmly into the slot of the connector.
3. Adjust pressure and pattern as desired.
4. After use, close lever and stop water.

After finishing, residual pressure may cause water to spurt out of the hose after releasing the nipple. When storing with nozzle attached, shut off the water, then open the lever to release excess pressure, and close again for storage.

Note: This product requires a standard Japanese hose connector. Do not connect when water is flowing.

**02902 ALAUNEN KAISER CHANGE Soft Wash Cloth**

A new style of cleaning cloth that can wash the body gently and quickly. The high-density, ultra-fine transitions thoroughly scrape out fine dirt, while you can enjoy a blissful cleaning experience with softness to the touch and good glide. Equipped with "Kaiser Change (transformation function)" that allows you to enjoy a variety of washing methods. If you put your hands in the left and right pockets, you can use both hands to clean large surfaces such as the hood dynamically and quickly, and also clean complex shapes neatly. If you stack the cloth in a mille-feuille shape, the cushioning will be improved, and you can wash with one hand free, such as washing with water.

**Directions:**

1. Rinse grit and dust thoroughly before use.
2. Soak cloth with water and wash vehicle with car shampoo. When using a bucket, create a lather and soak the cloth with the diluted solution, before scooping the foam and washing.

\* When washing with only water, rub the surface very lightly, without using force, while showering the body with water.

<How to change from dual pocket mode to glove mode>

1. Unfold the cloth, hold one end and fold it into the entrance of the pocket.
  2. Lift the edge of the folded side.
  3. Insert into pocket.
  4. Adjust shape to fit as a glove.
- \* After switching, it will be easier to wash if you put your hand in the 2nd or 3rd pocket from the bottom.

**02903 ALAUNEN KAISER ACTION Soft Drying Cloth**

A highly-absorbent cloth that can hold about 1 litre of water! Ultra-wide design with a width of about 100 cm makes it easy and quick to dry your vehicle. The need for continuous wringing-out is drastically reduced, and so work time is also greatly reduced; even minivans and SUVs can be finished quickly. You can change the way it is used, depending on how it is folded, and you can work comfortably drying both broad surfaces and in awkward gaps. The material has a rich and soft texture, gentle to the surface of coated vehicles.

**Directions:**

- Wipe down, while squeezing out the absorbed water frequently. When absorbing water over a wide area, put both hands in the pockets, pulling the cloth taut, and wipe off the water droplets so that they slide away from the body. Wipe body and glass lightly, for efficient and gentle drying of coated surfaces. After use, when washing and drying, hold both ends of the cloth in your hands and shake the cloth vigorously to raise the nap, making it easier for the texture to return after drying.

< How to put on twin mitts >

1. Put your hand in the pocket of the cloth and put it on.
2. Pinch it between your fingers and wipe it up.

How to install "Clean Wipers" (sold separately)

1. Extend the wiper so that the tip of the wiper is farthest from your hand, and then hook the tip of the wiper into the pocket of the cloth.
2. Grasp the middle of the cloth with one hand and lightly stretch the cloth with the other hand.

**02906 ALAUNEN WASH BAG**

A high-performance car wash sponge that uses different materials for differing surfaces. The front surface is 100% polyester fleece, so you experience car wash that gently strokes and cleans your car, with a soft touch and great water retention. The back side is made of a mesh fabric, which can be used to remove stubborn dirt, such as insect stains and bird droppings. With a whole load of sponge cubes stuffed inside, the structure provides incredible foaming. It also makes for an easy-to-hold tool, making the washing process less tiring.

**Directions:**

- \* Rinse the entire vehicle with water in advance to wash away any dirt or dust.

Soak with plenty of car shampoo and squeeze to create lather.

NOTE: When using undiluted shampoo, apply it to the mesh surface to make it easier to lather.

Wash with the fleece surface in a stroking motion. For stubborn stains that are difficult to remove, use the mesh surface and rub gently..

- \* Do not scrub with too much pressure, as it may cause scratches.  
\* After use, wash thoroughly and dry before storing.

**02907 ALAUNEN ULTRAFINE BRUSH**

This cleaning brush is specially designed, with different bristles of different sizes, to thoroughly clean details that cannot be reached with a sponge or mitt, such as around emblems and other awkward areas.

The flexible Wide Brush can clean complex areas like grilles very quickly, while the Slim Brush is great for targeting smaller areas.

Compatible with coated cars and matte painted vehicles!

And, not only cars, but also motorcycles with complex parts can be detailed extremely efficiently.

**Directions:**

- \* Rinse the entire vehicle with water in advance to wash away any dirt or dust.

1. Soak the area with water or shampoo solution before washing. When washing with water, scrub the surface gently, while pouring plenty of water on the body from a hose..

2. After use, wash well with water, wring out and dry thoroughly. If the product is particularly dirty, wash with a mild detergent.

**02905 ALAUNEN Long Sponge**

With the ability to quickly clean both near and far, high and low, ALAUNEN LONG SPONGE features a large 380 cm<sup>2</sup> cleaning surface, plus an extendable handle, for ease and flexibility of use.

The wide, flat sponge makes it easy to work, with a stable base to prevent slipping or twisting.

In "Short Mode" the large sponge efficiently covers a wide area, while in "Long Mode" it makes short work of hard-to-reach areas such as the roof and high-up glass, which are always awkward with regular sponges.

**Directions:**

Be sure to thoroughly soak sponge with water before use. If applying car shampoo directly, lather well with the sponge before using. When using shampoo diluted in a bucket, foam it up in the bucket, and scoop up the foam with the sponge to wash.

Rinse off any mud or sand from the vehicle before use.

After sliding the handle, make sure it is securely locked.

Safe for use on professionally-coated vehicles.

**JAN code****02908 ALAUNEN KAISER QUICK Soft Wash Cloth**

A regular-size cleaning cloth for the ALAUNEN series.

Unlike wool mitts or sponges, this 10mm thick fleece-based tool offers a completely new sensation, with low friction, high lather washing, for a gentle but effective clean.

The innovative fibres both attract dirt during washing, and relax during rinsing to release contaminants.

Introducing more users to the unmatched smoothness and softness of "fleece washing", this cloth is perfect for those trying it for the first time.

**Directions:**

**NOTE:** To avoid scratches, rinse any sand, dust, or other washable dirt from the vehicle before use.

Dampen the cloth with water, lather up the car shampoo, and wash.

If using diluted car shampoo in a bucket, foam up and thoroughly soak the cloth in the solution before scooping up foam to wash.

For best results, we recommend using Soft99 brand car shampoo.

When using only water, gently scrub the surface without applying excessive pressure, while continuously spraying plenty of water on the body using a hose shower, etc.
