**PROSPEC Leather Protection Coat**

Combining flexible functional polymers with polysiloxanes, this coating cures with a 3D polymerisation reaction to form a durable protective coating for automobile leather, boasting excellent resistance to both water-based stains, such as colour running and sweat, and oil-based stains such as grease or crayon. By preventing the adhesion and absorption of contaminants, the coating makes it easy to simply wipe the leather clean. There is no need for mixing or any other special curing procedures, so application is simplified.
